Congratulations on your new Airstream! Though you might be tempted to think of your Airstream as a car built by robots, it's really much more akin to a house, built by hand, and as such it will have a break-in period. As your Airstream travels over the miles and is subjected to big changes in temperature and humidity, certain adjustments may have to be made. For that reason, Airstream has a network of certified Dealer Service Technicians and the best warranty in the business. Please keep a list of any needed adjustments so that we can stand behind our products and keep them in top working order. Your satisfaction is our ultimate goal, and we trust that your new Airstream will serve you well for many, many years!
